Subject: Immigration fees

Dear Sir or Madam,

I write to urge you to act so as to prevent the fees for application for residency and citizenship from allowing already challenged families and individuals to complete their regularization process. This country has always been a haven to others and a model of freedom. Immigration contributes to its enrichment and always has. There are already many hurdles to clear for those who apply. Some are needed, but a prohibitive fee does not seem to me to help us select the new citizen our country should be accepting. In fact it needlessly hurts the process. Please do what you can to assure that the application procedures be as humane as possible.

Sincerely,

Mimi Jennings

St. Paul, MN
