Subject: FEE INCREASE

I disagree with the new fee increase that USCIS is planning to put into effect in the near future. First, there is always an increase in the fee alleging that they will speed up the process, however, that never happened, the only thing that they have done regarding the speeding process is the Infopass, which allow us have an appointment an not to wait hours outside the immigration office. Second, your allegation that 'half' of the applicant for I485 apply for I-131, and for that reason you will include that a fee in the new application; I disagree with your position because you will affect more that half of the I-485 applicants that do not want to travel outside.
