I do like the new changes for 2008/2009. The one thing that I really like is that it would go faster; it would not take that long for application. I was little concern when I saw an estimate pricing. For N-400 right now 330.00 and for 2008/2009 it would increase to about 595.00, it's a big change and it increased by 265.00, wow. All of the other things I really like, however price increase is concerning me.
