Subject: USCIS 2006-0044

To Whom It May Concern:

I would like to express my concern over the proposed rule, 2006-004, which would increase the Immigration Examinations Fee. As a family who has adopted and baby girl from China, and is in the process of adopting again, the increase in fees comes as a blow. There is now a wait in China of 17 months to even get a referral so we will have to renew some of our USCIS info. The cost of international adoption is already high, and now our country proposes to incur more fees.

For abandoned children all over the world and the people who want to provide loving homes for them, please reconsider your price increase.

Thank you,
