

USCIS Proposed Fee Increase on Naturalization Fees

Dear Sir/Madam:

The proposed increases hurt low-income and middle income families and individuals. Many legal permanent residents, like my wife Natalie, are eager to become naturalized but instead of encouraging them and providing an incentive, this proposed legislation does the opposite.

I urge you reconsider this and keep the fees where they are now, or even better, reduce the fees and facilitate the naturalization process further for all the many permanent residents eager to called themselves U.S. citizens.

Thank you for your attention.

Best regards,

Carlos Giron
