Dear rule makers:

The proposed immigration fee increase is huge with little benefit to affected immigrants. For I-485 the 178% of fee increase will result a 20% of shorten of processing time does not make much sense. Besides if the promised 20% shortening of process time is not delivered, will the immigrants get refund of some sort? Affectedl immigrants do not have the option of not paying such a big jump of fees if it is get approved. And affected immigrants do not have the power to vote it out either. I hope USA will stay as a just country, if not it will not be worth to immigrate to USA.

May God bless America!

Regards,

Jiayi Fang
