**Subject:** New Fees for Immigration and Naturalization Benefit Applications

To the Director, Regulatory Management Division of US Citizenship and Immigration Services:

I am writing to urge you to abandon the proposed 66% increase in fees that could possibly be imposed upon applicants and petitioners for citizenship and green cards. I believe it is important to make this process more affordable for those who truly want to become Americans. It would seem that raising fees would only encourage people to continue seeking illegal entrance to our country. As far as raising fees to discourage terrorists; if someone wants to kill Americans that badly, they'll find a way. If the fees are being raised to discourage people from becoming citizens in general, then just close down immigration, ship all illegals home and bring the US soldiers back from the Middle East to patrol our Mexican and Canadian borders.

Sincerely,

Marita Justice
