Subject: USCIS-2006-0044

To Whom It May Concern:

I am writing you on behalf of families involved in adopting orphan children with regard to the proposed rate increases. There are so many charges that one incurs when trying to adopt a child. It not only involves the current charges that USCIS charges but also all of the paperwork, agency fees and then the travel that will be involved.

Since the rate increases will **not** result in more services that will be provided, please do not make this change which will result in greater hardships on families who are already sacrificing trying to make a difference in a child's life. I think that the amount of time that it takes just going through this process is a big enough hardship. Please don't add anymore.

Please reconsider the proposed changes.

Thank you.
