I want to comment on the proposed increases in fees for the following applications:

Green card, work permit, naturalization, and travel documents

I am opposed to these increases as they will make it harder for low-income immigrants to be able to afford the fees for the programs that offer needed benefits, such as the work permit.

Also, to increase these fees so drastically in such a short period of time in comparison to other fee increases that have been done incrementally seems to be wrong.

I would appreciate your consideration of not raising the fees as proposed.

Thanks.

Stephen Copley
