**Subject:** No more increases

In my opinion immigration should not increase the fees for any application. This agency is receiveng millions of dollars annually and so far the service is getting worse. All the processes are getting longer. There is more discrimination during the interviews.

People are struggling with high gasoline prices, higher inflation and cost of living.

Why the increases have to be over 5%, why 287%! That is outrageous, that is too much.

Immigration has been increasing fees many times and instead of hire more workers to speed up the process, it is getting worse and slower.

Workers are drinking more coffee and sociliazing in the offices instead servicing the public who has to wait hours to be interview.

**As a human act stop the proposed increases.**

enough is enough.

Kelly
