

Dear USCIS:

I oppose the proposed application fee increases because of the negative impact it will have on our society.

America is supposed to be an inclusive and embracing environment. I feel that these fees will not be the right message to those immigrants who are trying to stay or come to this country legally. Aside from the negative message it sends I also believe that these proposed fee increases will prevent immigrants who are legally trying to enter or stay in this country from applying. Therefore, I think that it will lead to a higher rate of illegal immigrants within our communities which will, in turn, cause a bigger financial strain on its citizens.

I hope that you will re-evaluate effects of these proposed application fee increases. These fees will increase the strain that our communities already face due to the amount of illegal immigrants that we already support. Please do what is best for the citizens of this country.

I believe that there are other ways that USCIS can offset its administrative costs, possibly by urging you to encourage the United States Government to contribute funds to USCIS.

Thank you for your time and consideration.

Sincerely,  
Diane Vy Nguyen-Vu
