Greetings,

I am writing to express concern about the proposed increase in fees for filing immigration forms. I believe this increase places an undue burden on people who are already struggling to get established in this country, a belief that is based on personal experience with a friend who immigrated from Russia a few years ago. As a single mother, she may literally be forced to decide between paying her rent and paying these proposed increased fees.

Thank you for reading these concerns.

Stephen Reid
